Bias Motivated Incidents Report Discussion

• A total of thirty-three incidents were reported for summer/fall 2007, compared to thirty-six reports for summer/fall 2006.

• Twenty-six reports received were from the University Park campus; Six reports received were from the Altoona campus; and one report received was from the Shenango campus.

• When it was possible and if the submitter provided contact information, each case submission was followed up with a contact by the Diversity Advocate. In a few instances, the targeted person was encouraged to make an additional police report. Where the perpetrator was known, contact with that individual or that individual’s supervisor was made. In one instance, a Muslim student leader was harassed via e-mail on six separate occasions. This incident was likely a byproduct of the David Horowitz sponsored Islamo-Fascism Awareness Week from October 22–26, 2007. Since the incidents were similar and occurred with the same individual and his student organization, The Muslim Student Association, the occurrences were counted as one incident. Police involvement did occur and one of the perpetrators was contacted.

• As always, confidentiality of identities and information will be respected, unless otherwise indicated by the submitter or targeted person.

• Multiple categories often exist for the status of Targeted Persons, Race/Ethnicity, Targeted Issues, and Types of Offense. An effort is made to indicate one choice, and that being what best describes an incident or individual, or how the individual may identify themselves. However, in some instances where appropriate and where overlap exists, more than one category is chosen and indicated. This accounts for the occasional slightly higher numbers within a category than the total number of reports given.

• The data collection forms were not always similar from campuses and police. Therefore, this statistical account represents varied information about characteristics of targeted individuals, those who submitted reports, and perpetrators. In the future, efforts will be taken to ensure uniformity of data gathered and reported.
